CANGOOSE GOVERNANCE pNFT (CGT)

-An Improved NFT for Enterprises' DAO
-Golden key to enter future Metaverse
for businesses

About Cangoose

Number: A0118636

CERTIFICATE OF REGISTRATION

BUSINESS CORPORATIONS ACT

I Hereby Certify that CANGOOSE CONSENSUS FOUNDATION has been registered as an extraprovincial company under the Business Corporations Act on June 16, 2021 at 02:20 PM Pacific Time.

Issued under my hand at Victoria, British Columbia On June 16, 2021

CAROL PREST
Registrar of Companies
Province of British Columbia
Canada

ELECTRONIC CERTIFICATE

CANGOOSE CONSENSUS FOUNDATION was Federally incorporated in Canada in June 2021, it headquarters in Vancouver B.C. Canada.

CGT on Chia

CGT(CanGoose Token) is a creative puzzle like governance Non Fungible Token(pNFT) that is developed and built on the Chia network, it is a "Greener Blockchain" in terms of relying on storage instead of energy-intensive computations to secure transactions.

CGT is the Golden key to enter future Metaverse for businesses

Our Goal is: In 6 years, help 169 business complete their tokenization process.

Cangoose Value

Intelligent

CANGOOSE is designed to help enterprises create their own affordable blockchain infrastructure, including but not limited to a smart loyalty reward and exchange system, as well as preforming duty governance for their decentralized autonomous organization(DAO).

Our Achievements

Chia Farming

GameFi Design Black Hole

We have developed our own black hole burning protocol to ensure CANGOOSE continues to be a deflationary blockchair ecosystem on Chia network.

dPOOL CONCHIA

We have established a brand new dPool for Chia farming, Conchia is a new pool style for Chia ecosystem with the decentralized, distributed and storage shared pooling structure for not only farmers but also other pools. The core concept of this dPOOL is: under the principle of sharing storage computing power, using decentralized distribution and STORAGEFi to form a community of common interests of the farmers and other pools.

We finished nearly 1
PETABYTE plotting
space on the Chia
network for farming

We have started par invistery box Gamefi design

POOL.CONCHIA.COM

(Launched)

Conchia is a new style pool of chia ecosystem with the decentralized, distributed and storage shared pooling structure for not only farmers but also other pools.

CONCHIA Storage unit and COLD WALLET

(Coming Soon)

The storage unit faced the market already, the cold wallet technology is under development

cangoose's core technology can allow any popular business or brand to be able to have their own blockchain as part of the Chia blockchain and an off shoot or fork as they choose, and that will help that company with better management, and it will allow them to access their own smart loyalty reward system which is really great for customer acquisition and retention. Most importantly, this core technology will prepare them to be ready for the new Metaverse era on a business level.

This Exchange system is great for customers, great for loyalty and helps business all around

CANGOOSE and CHIA

At the same time, reply on CHIALISP open source community, CANGOOSE will also encourage and support the enterprises within the eco-system to create a group of individual green blockchain on a enterprise level. Every enterprise on CANGOOSE will be able to issue their own smart royalty program, bring traditional point system new value, and integrate its NFT with its own corporate culture, get ready to emerge in the new Metaverse era. In other words, based on all what CHIA network offers and CHIALISP can do, the decentralized autonomous enterprises on CANGOOSE eco-system will be competitively intelligent, greener and more secure.

The CANGOOSE Governance Non Fungible token(NFT) contains both governance and digitalized value carrier functions. The CANGOOSE eco-system is a group of mainnets for their digital assets that build and share together on a enterprise level.

Currently, the CANGOOSE eco-system empowers the tokenization process for tradition business, it is a green and efficient solution for this transformation, it is the golden key to enter future Metaverse for business.

CANGOOSE Tokenomics and Business Model

CANGOOS GOVERNANCE PNFT (CGT) VALUE MODEL

CGT Total Allocation Structure

CGT Business Model: B2B2C

CANGOOSE Source of Income

Technical operations

Maintenance costs of the mining pool and StorageFi

CANGOOSE CGT Allocation

The core concept of this dPOOL is: under the principle of sharing storage computing power, using decentralized distribution and storageFito form a community of common interests of the farmers and other pools.

The Participants of this dPOOL are: farmers and other pools

Allocation: (calculation is Based on Take 1% technical operation and maintenance fee of the production currency)

- Technical team 0.3% (unlimited reward levels)
 0.2% of mining pool promoters and alliance mining pools (unlimited reward levels)
- Marketing promotion: 0.3% (two levels, 0.1% for top A level, 0.2% for B level)
- Airdrop: 0.05% (total revenue)
- Mystery box: 0.15% (total revenue)

Functionality of CANGOOSE CGT

CANGOOSE's governance pNFT is using the Green blockchain Chia Network as infrastructure, create pNFT(puzzleNFT) model, fully utilize its puzzle like voting, fractional rights and transferable inheritance, to empower the transformation for enterprises into decentralized autonomous organization(DAO). For example, For example: in a automotive vehicle manufactory, a employee in a production department for making parts, can vote his or her right to a upper management using pNFT governance right all the way to CANGOOSE. In order to improve a smarter management environment for business operation and increase liquidity, CANGOOSE will separate this pNFT for the business into governance right and digital asset two parts. During this process, business will result in a smarter management at no additional cost.

Puzzle like voting can ensure voting in a smart reliable way; fractional rights can benefit governance rights and encourage a better reward system; transferable inheritance can solve the pain point of loosing digital asset due to unexpected event. Trough smart contract, CANGOOSE can help business mandate its governance right and inheritance, when a preset condition triggers, the smart contract will implement the specified closure.

CGT integrates with its own Green Black Hole Agreement, the mechanisms consist with 3 modules

CGT pNFT module reserved for black holes (Multisignature)

The value of each pNFT mojos cannot be increased or decreased

The total supply is Reserved

The mojos designed to be destroyed can only be transferred to the black hole for destruction the pNFT module;

And when that mojo is destroyed, the black hole will generated the destruction of a pNFT and a reward pNFT at the same time.

The pNFT black hole destruction module: there is No private key in this module, it contains two modes:

a.Reserved destruction
acceptance mode
b.Unconditional destruction
acceptance mode

Black hole destruction reward pNFT

module

In this module :it has Multi-signature

In this module, it has Multi-signature design

 Black hole rewards pNFT for participating the destruction, and reward with certain percentage of mojos (1% of the total reserved destruction tokens)

CANGOOSE Vision

- **❖** We believe that a greener blockchain is the core infrastructure for future Metaverse
- *We believe decentralized autonomous organization(DAO) is the primary spirit for a greaner blockchain

 Cangoose
- **❖** We believe Intellectual Property (IP) for business is the main element for a successful DAO

CANGOOSE Blockchain Solution

The CANGOOSE green smart royalty reward system links business with Chia eco-system, completes its tokenization infrastructure foundation, forms a realistic value exchange system between the business' branding, employees, supply chain, private domain traffic, and creativity on a enterprise-grade.*

With Web 3.0 and Metraverse incoming, it makes to mandatory for business to adapt to a new economic form. CANGOOSE is designed to help enterprises create their own affordable blockchain infrastructure, including but not limited to a smart loyalty reward and exchange system, as well as preforming duty governance

for their decentralized autonomous organization(DAO)

With green black hole protocol technology and dPOOL magnesium, smart payment system, greener storage unit and clod wallet, CANGOOSE will help enterprises complete their blockchain infrastructure architecture with high efficient speed and a very affordable price.

CANGOOSE would like to invite everyone, business and global consumers to join our eco-system, explore and embrace a greener, better Metaverse together.

Thank you for watching.

We hope to see you soon on CANGOOSE platform.

THANKYOU!
